

NetPlay Queue User Guide

Queue, court and payment manager for badminton and pickleball

Badminton · Pickleball · Works offline · 4 languages · Free and Pro

menameis-jack.github.io/netplay · netplayqueue@gmail.com

Before you start

Open the app

- Go to **menameis-jack.github.io/netplay** in your browser.
- No sign-up and no install are needed. After the first visit, it opens without internet.
- To use it like an app, open **Menu**, then **Install on home screen**.

Choose your game

- Tap **Badminton** or **Pickleball** at the top. The icons follow your choice.
- While a game is running, the other game is greyed out. It unlocks after you end the game.

Always use the same browser

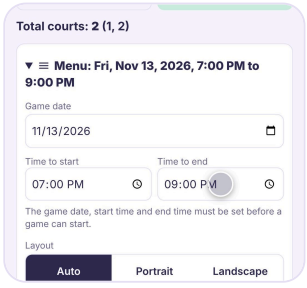

- **Your data lives in one browser.** Players, payments and the Pro unlock are saved inside the browser you use. Another browser shows an empty app.
- **Samsung and other Android:** use Google Chrome. Samsung Internet also works.
- **iPhone and iPad:** use Safari.
- **Do not use** a private or incognito tab, and do not open the link inside Facebook, Messenger or Instagram. Choose “Open in Chrome” or “Open in Safari” first.
- **Do not clear the browser data.** That deletes your players, payments and Pro unlock.
- **Keep a backup.** In **Menu**, tap **Save backup file**. Use **Restore from backup** to bring your data back, or to move it to a new phone.

> **Pro code:** the Device ID is different in every browser, so a Pro code made for one browser will not unlock another, even on the same phone.

1 Set the date and time first

1. Tap **Menu** to open it.
2. Check the **Game date**.
3. Set **Time to start** and **Time to end**.
4. Tap **Menu** again to close it.

> A game cannot start until the date, start time and end time are set.

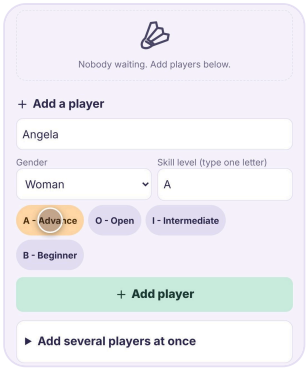

Menu with the date and times

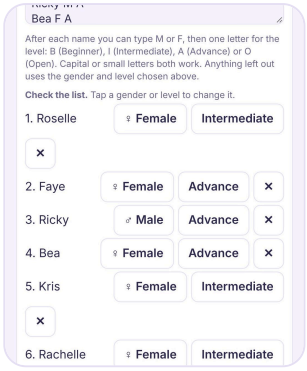

2 Add your players

1. **One player:** type the name, choose **Woman** or **Man**, tap the skill level, then tap **Add player**.
2. **Several players:** open **Add several players at once** and type one player per line: the name, then M or F, then the level letter. Example: **Jack M A**.
3. Tap **Preview** to check the list, then **Add all**.

> Skill level letters: **B** Beginner **I** Intermediate **A** Advance **O** Open. Any other letter gives an error. The same name cannot be added twice.

One player

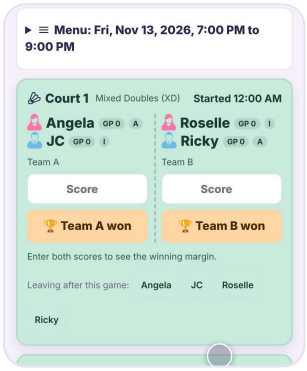

Several players, preview

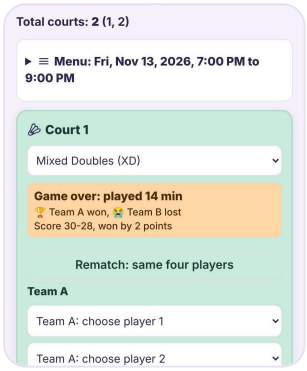

3 Run the games

1. Under **Court numbers**, type your courts, for example 1, 2, 3. Choose a category for each court.
2. Tap **Auto fill** to pick four fair players, or choose the players yourself.
3. Tap **Start game**. The clock starts.
4. When the game ends, tap the **winning team**. Type each team's score first if you keep scores.
5. Use **Next up** to line up the next team while the courts are busy.
6. At the end of the session, open **Menu** and tap **End game** twice.

> Players who just finished are picked again only when nobody else is waiting. The Leaderboard updates after every game.

A game in progress

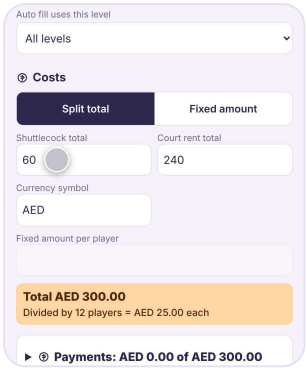

After the result

4 Set up payments

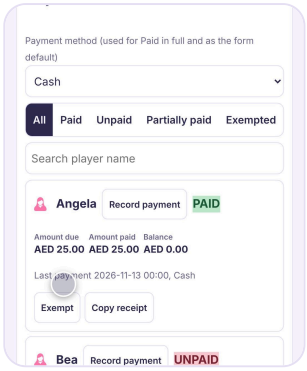

Pro

1. Under **Costs**, enter the **Court rent total** and the **Shuttlecock total**. The app splits the total between all players. Or choose **Fixed amount** per player.
2. Open **Payments** and type your name in **Organizer name**.
3. Tap **Paid in full** when a player pays. Use **Record payment** for a part payment, and **Exempt** for a player who does not pay.
4. **Copy receipt** gives a message you can send to the player.

> Optional: set a **Payment lock (PIN)** so only you can record payments.

Costs and total

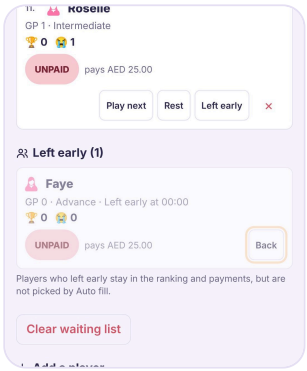

Player payment cards

5 A player leaves early

1. In the waiting list, tap **Left early** on that player.
2. The player moves to the **Left early** section and is no longer picked by Auto fill.
3. Tap **Back** if the player returns.

> A player who left early stays in the ranking and still pays a full share.

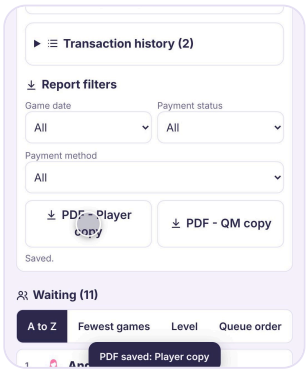

Left early section

6 Export your reports

Pro

1. Open **Payments** and scroll to **Report filters**.
2. **PDF - Player copy:** for the group. It lists each player's amount and ends with the Games Played Ranking.
3. **PDF - QM copy:** for the organizer. It adds the totals collected, exempted players and each court's category.

> The PDFs cover the current game date only.

Export buttons

Free and Pro

Feature	Free	Pro
Courts	Up to 5	Up to 12
Add players one by one or several at once	✓	✓
Auto fill, Start game, results and Leaderboard	✓	✓

80 AED
Lifetime, 2 devices

How to buy

1. Open **Menu** and find your **Device ID**. Tap **Copy**.
2. Email it to **netplayqueue@gmail.com** with the plan you want and the words “Buy Pro”. For a second device, send that device’s ID too.
3. You get the payment details by email. After payment, you get your Pro code.
4. Paste the code in **Menu** and tap **Unlock Pro**. The title changes to “NetPlay Queue Pro”.

> You can try Pro first: open **Menu** and tap **Start free trial (2 uses)**.

✦ Tips and fixes

Problem	What to do
Start game does nothing	Open Menu and set the game date, start time and end time.
The app is empty, or Pro is gone	You are in a different browser or a private tab. Go back to the browser you used before.
The Pro code is refused	The code is locked to one Device ID. Check that you are in the same browser the Device ID came from.
Paid in full gives a message	Type your name in Organizer name, and set the costs so there is an amount due.
A level letter is refused	Use only B, I, A or O. Write a last initial with a dot, for example “Tim S.”
The page looks like an old version	Close the tab and open the link again. If it is still old, add **?v=2** to the end of the link.
The other game button is grey	A game is in progress. Tap End game twice in Menu to unlock it.
Changing phone	Save a backup file on the old phone and restore it on the new one. Email the new Device ID to get a Pro code for it.
“This Pro code has been cancelled”	The seller cancelled that code, for example after a refund or when a code was used on a device that was not paid for. The app turns Pro off the next time it opens with internet. Email netplayqueue@gmail.com if you think this is a mistake.
Made a mistake	Tap **Undo** to take back the last change.

☰ More in the Menu

- **Language:** English, Arabic, Filipino and Hindi.
- **Text size** and **Layout** for phones and tablets.
- **Share session summary** to send the results to your group chat.
- **Quick tour** and **Browser guide** inside the app.
